Top stories of the week

➤ Oil markets remained steady Friday despite a second weekly loss as traders balanced cooling American inflation against potential OPEC production increases. While lower consumer prices offered optimism, geopolitical tensions between Washington and Tehran maintained a conservative sentiment. President Trump's measured diplomatic approach has currently tempered fears of military supply disruptions, even as Russia prepares for peace talks regarding Ukraine. Meanwhile, Venezuelan oil sales supervised by Washington, Venezuela exceeded one billion dollars. The International Energy Agency noted temporary supply dips in Kazakhstan field operations but still expects 2026 global production to significantly outpace slowing demand growth throughout the upcoming calendar year period.

➤ The Iberian Peninsula may soon overtake the Netherlands as Europe's premier LNG bunkering hub due to surging supply volumes in Spanish and Portuguese ports. Gasnam indicates that regional LNG supply quadrupled over two years, reaching nearly 894,000 cubic meters in 2025 and narrowing the gap with Rotterdam's totals. This growth is supported by a flexible distributed port model across cities like Algeciras and Barcelona, contrasted with the Netherlands' concentrated infrastructure. With additional bunkering vessels under construction and biological gas capturing a twelve percent market share, the region is strategically positioned to lead the European marine fuel market through enhanced capacity.
